

Satellite Assembly

Parts List

A Base
1 piece

B Table
surface
1 piece

C 4 bolts

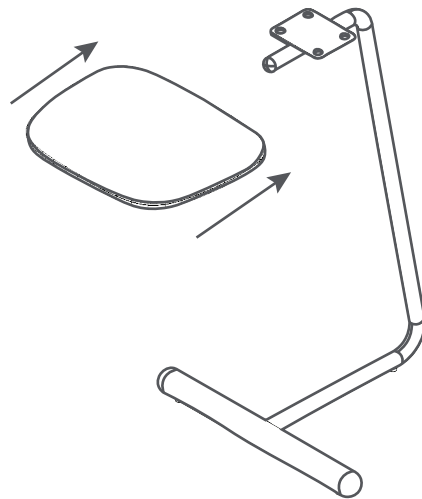

Tools included:

Allen wrench

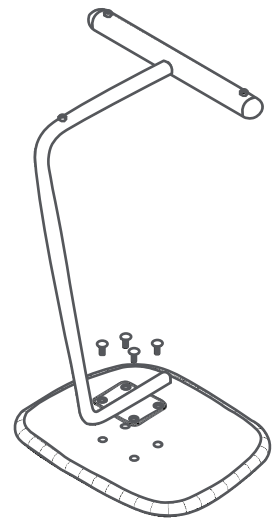

1 - Align parts correctly

Align the widest edge of the table surface (**B**) to be perpendicular to the stem of the base (**A**).

2 - Attach the surface to the base

From an upside down position, align the holes of the base (**A**) to the holes of the table surface (**B**). Place the 4 bolt (**C**) into the holes and using the Allen wrench to secure the base into the table surface.

3 - Return table to upright position

The satellite table is ready for use
