TECHNICAL INFORMATION

collection	content	thickness	cleaning	discover more online
<p>grade 8 leathers</p> <p>Natural, full grain leather with an enhanced supple hand and wearability.</p>	100% leather	1.2 - 1.4 mm	WS	
<p>grade 6 leathers</p> <p>Pre-embossed, top grain leather with a durable, protective UV finish.</p>	100% leather	0.8 - 1.0 mm	WS	
<p>grade 5 leathers</p> <p>Consistent leather patterning at a great price.</p>	100% leather	0.8 - 1.0 mm	WS	

WS: Clean with one of the following: 1. mixture of rubbing alcohol and water, 2. leather cleaner you find at a store (always test a small area first) or 3. vinegar and linseed oil. Use a lint-free cloth. Damp the cloth into your cleaning agent and gently scrub the stained area. Use a dry, lint-free cloth to dry the area. Repeat if needed. Keep leathered upholstery out of direct sunlight so the material doesn't dry out and fade/crack.

Via Seating leathers all pass Prop 65.

great things happen in a chair
